

Interview questions

You will be expected to administer the 3 interview questions you selected to each of 6 students

Choose 2 students from each achievement level, beginning, intermediate, advanced

Expect to spend about 15-30 minutes per student (5 -10 minutes per question)

Try to avoid the potential for students discussing the questions among themselves

(Please video all interviews. We are working on a way to save these and will provide information via email asap.)

Probes

You will administer each of the two probes you selected to about 25 students

Make sure students from varied achievement levels are included in your sample set.
